

Title:	DVR Firmware upgrade		
Date:	11/23/2010	Version:	1.0
Product:	HIKvision DVR's		
Action Required:	Information Only		

How to upgrade your systems Firmware

In order to get the latest firmware contact your Hikvision Tech Support. If a newer version is available the firmware will be e-mailed to you.

1. Download the latest firmware to a USB memory stick.
2. Insert the memory stick into the DVR's USB port
3. From the main menu go to the "Maintenance" menu
4. From the "Maintenance" menu click on "Firmware Upgrade"
5. From the file list highlight the appropriate file name and click on the Upgrade button (ex. DIGICAP.MAV).
6. Upon completion the system will reboot.
7. After the rebooting the system will bring you back to the main menu.
8. Verify your camera and recording settings have not changed.
