Capture what matters, when it matters

When it comes to safety on the road, Hikvision Canada has you covered. With over 20 years of experience in video surveillance, our dashcams provide the peace of mind you have come to expect from the global leader in video surveillance.

Easy, hands-free protection

Don't want to fuss with wires and confusing software? Hikvision Dashboard Cameras, with built-in GPS, are easy to install and easy to operate. Access everything you need from an app on your phone. The dashcam wirelessly uploads video images to your phone via Wi-Fi, enabling you to view and manage your video and camera settings with the touch of a finger. Drive with confidence, knowing the dashcam is keeping an extra eye on the road.

Reliable image quality and sound

Rely on our dashcams to provide high-resolution image capture of any incidents that threaten your safety on the road. Mics and speakers come standard on all Hikvision dashcams. You can trust your camera to collect a full and accurate representation of all of the events the camera records. Your dashcam will see and hear what you might have missed while you were focused on the road.

Collision protection

Be confident your images are saved in case of an accident. The built-in features of the cameras trigger the G-Sensor to automatically lock the recording video on the Micro SD card when it senses impact. This feature prevents your valuable footage from being overwritten and lost. In the case of an accident, your dashcam can be your greatest piece of evidence. Trust Hikvision to make sure those vital images are safe and secure.

Hikvision dashboard cameras also support ADAS (Automatic Driver Assistant System) functionalities which include green traffic light alerts, front vehicle moving alerts, speed limit sign alerts. Hikvision Dashboard Cameras provide impressive, sharp and crisp image quality. Your dashcam will be always there for you when you need it, with superb balanced performance, day and night.
