HIKVISION EXPLOSION-PROOF CAMERAS

HOW TO PREVENT EXPLOSIONS

The Three Elements of Combustion

Explosive substances and combustion-supporting gases are the external factors that explosion-proof product manufacturers can hardly control. However, manufacturers can control the internal factor – the combustion source. And this can be achieved through the structural design and material selection of the product.

Explosive substances
(Combustible gases & solids)

Combustion-supporting gases
(Oxygen)

Combustion source
(Controllable factor: Sparks or flames)

Explosion-Proof Structure

Hikvision explosion-proof cameras use flame-proof housing and a cylindrical flame-proof joint. The adhesive joint guides internal explosive gases to the conduit to prevent combustion from escaping the camera when an explosion happens.

BACKGROUND

With flammable and combustible materials such as gas, oil and powders, places like coal mines, gas stations and chemical plants are prone to explosion risks. In these hazardous places, the design and use of all machinery and electronic equipment must meet the explosive atmospheres regulations to make sure they will not cause explosion.

When it comes to video security in explosion-prone areas, specially-designed explosion-proof cameras is the solution.

Explosion-Proof Materials

Hikvision explosion-proof cameras are covered by 304/316L stainless steel, and the thickness of the cover is more than 3.5 mm. Using ANSYS for finite element force analysis, the structure can withstand a maximum pressure of 198.36 MPa. No broken or permanent deformation results after the simulated explosion.

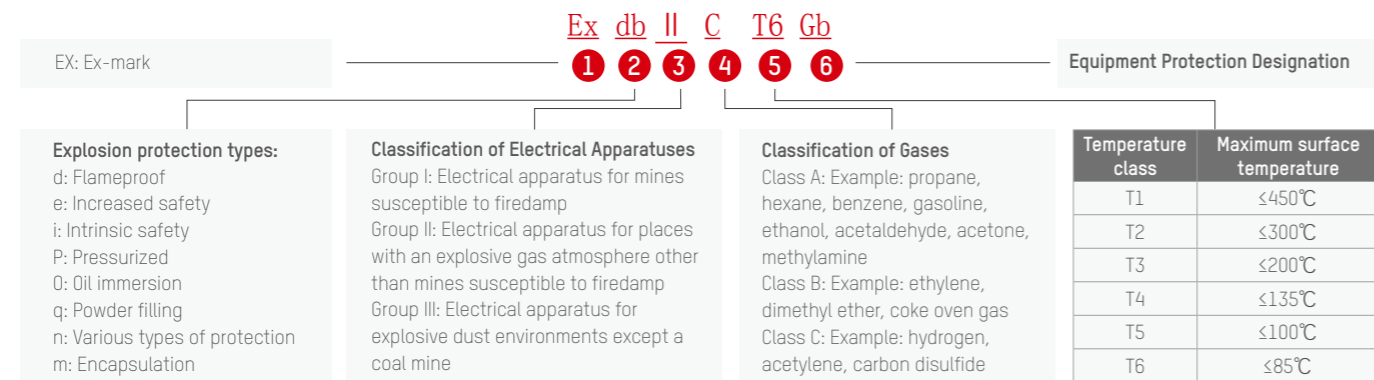

Hikvision explosion-proof cameras are customized network cameras inside heavy-duty housings. Certified for explosion-prone applications, they offer high-quality video monitoring and unparalleled smart functions to detect anomalies and protect your staff and properties in the hazardous environments.

CERTIFICATION

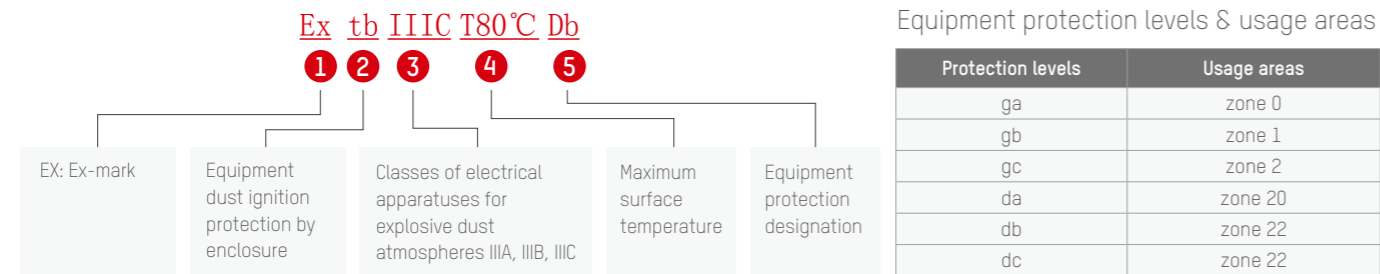

IECEX Authentication

The IECEx authentication includes 'Gas Explosion-proof' and 'Dust Explosion-proof' certifications.
