

Resuming Operations with Enhanced Protections

Back-to-Business Solutions for Offices

As businesses around the world reopen and resume operations, people are getting back to work and back to their daily routines. Hikvision's Temperature Screening Applications for Office Buildings integrate into security and access control systems in convenient ways that really work.

Typical Scenarios

Work Areas and Offices

Other Areas, Like Lobbies and Canteens

What Are the Challenges?

Getting back to work today requires setting up systems that protect employees without creating a new obstacle for them. But how can new hardware stay out of the way while enhancing safety?

- Measuring skin-surface temperatures one person at a time is terribly inefficient in a busy workplace
- The more contact people make, the higher the risk of hygiene issues
- Congestion in areas of heavy foot-traffic slows down productivity, obstructs time & attendance recording, and more.

Our Solutions

Now with Hikvision Back-to-Business Solutions, all the specific needs for a typical office scenario can be easily met.

Multi-Site Temperature Screening

A variety of products and measures for safe and efficient temperature screening in all areas.

Fully Touch-Free Access and attendance check

Embedded facial recognition for hands-free access authentication in key areas.

Highly Centralized Management

Instant visualization of emergency events and overall statistics for situational awareness.

Entrances - Temperature Screening and Mask Detection with Information Display

Preliminary temperature screening creates convenience and protection at building entrances for registered employees, visitors, vendors, and more. Hikvision's camera models with higher resolution make it possible to measure multiple persons' temperatures at a time, with additional functions of mask detection, identity verification & unregistered visitor alarm. Under necessary conditions, the information of temperature and mask status can be display on floor-standing digital signage or monitors with digital signage box, which can serve as advertisement media player in the meantime.

Highly efficient temperature screening & mask detection with thermographic cameras

Intuitive information display with 3-in-1 displays

Digital Signage Box + Monitor

Floor Standing Digital Signage

Stripe light to indicate different types of alarm

7-inch LED Display for People Counting and Alarm Number Summary

Work Areas and Offices - Temperature Screening with Access Control

In office areas, Hikvision's touch-free MinMoe Terminals provide a quick, easy, and safe way to manage access control. Users can easily add or remove profiles, generate reports at regular intervals, and set parameters according to their unique needs including temperature screening and mask detection. Hygienic and touch-free, MinMoe access control terminals will enhance employee walkways with high accuracy and efficiency.

Temperature screening & mask detection & attendance and access with MinMoe terminals

*Hikvision's temperature screening products are designed for the detection of skin-surface temperatures so as to achieve rapid preliminary screening in public areas. Actual core body temperatures should be further confirmed using clinical measurement devices. Under any circumstances, it is highly recommended to use Hikvision's temperature screening products in accordance with local laws and regulations.

Other Areas, Like Lobbies and Canteens – Mask Detection and Intrusion Detection

For places where workers and other staff gather together and carry out daily activities, Hikvision's IP cameras with the function of high-efficiency mask detection can help create a safer environment. In the meantime, it can focus on human/vehicle intrusion with higher accuracy, enhancing perimeter protection.

Lobbies

Canteens

Control Room Centralized Management

At the control room, the site managers and security staff of office buildings can view statistics and records of employee attendance, along with temperature and mask status in real time using HikCentral. This supports temperature data storage, abnormal temperature trend analysis, live viewing, playback, access, and alarm management, and can also be applied for efficient vehicle and visitor management, employee management.

Integrated Security Solution

HikCentral Professional

*Hikvision has endeavored to optimize its products and helped its customers to reduce the compliance risks on data protection law. However, it is still important for customers to check out the legislation and government guidance for their business regularly, given things are changing all the time. Customers should be responsible to make sure all business are complied with local privacy laws and regulations, including GDPR.
