pick-up & play

Noise & echo  
reduction

8-microphone  
omnidirectional array

Wired & wireless  
connections

Compatible with most  
mainstream software

**Sound Cube** ▲  
Wireless model: S1

**Sound Cube** ▲  
Wired model: S1V

Are online meetings a regular part of your office? Do you have trouble hearing one another with those underpowered laptop speakers? When more than one person speaks, is it impossible to hear anything clearly? Online and remote conferences are regular parts of the workday for most professionals, so why use sound equipment that makes these important meetings useless?

**Hikvision's Sound Cube changes all that.**

## Clear audio and stable sound all around

\* Participants don't need to huddle round the speakerphone while speaking and listening.

Immersive 360° sound keeps the conversations flowing

The Sound Cube empowers communication and collaboration with up to 16 in-room participants and even more connecting remotely.

With 8 omnidirectional microphones, the 360-degree sound pick-up allows attendees to be included from every angle with no need to huddle round while speaking. And, those out of the office stay in sync with clear audio through a surround sound speaker – they sound like they are in the same room.

With a sleek design and minimalist aesthetics, the Sound Cube fits perfectly in your office, in the conference room, and anywhere you need it.

# Keep everyone intimately involved

Ambient noise and reverberations get filtered out

Thanks to **AI-enabled noise reduction**, the clarity of human voices can be preserved even in challenging environments. Participants can be intimately involved when reverb and background noises – like air conditioning humming, keyboard tapping, and more – are intelligently filtered out.

Air conditioning humming

Keyboard tapping

Knocking on the table

## AI noise reduction

An intelligent algorithm identifies transient noises and filter them out.

Transient noise reduction    Steady noise reduction

\*Transient noise includes sounds of tapping on a table or keyboard, etc. Steady noise includes air conditioning hum and other ambient noises.

## Echo suppression & Anti-reverberation

**Echo suppression** decreases audio feedback, ensuring the speaker's true voice picked up.

**Anti-reverberation** helps the speakerphone to get human sound more directly, and diminish the sound artifacts due to reverberation caused by hard surfaces such as walls, ceilings, or conference room tables.

Howling sound

Audio feedback

# Get connected, quickly and easily

Intuitive and easy to answer and adjust or mute volume

Hikvision Sound Cube makes it easy to adjust the volume up or down as needed, delivering crystal clear sound even at max volume level. Complex technical difficulties can ruin an otherwise simple and productive meeting. With the Sound Cube, a simple tap on the button quickly accesses meetings or ends calls instantly and seamlessly with an intuitive interface, making conferencing more productive and less stressful.

## Designed for everything you need to do

Flexible connectivity options for smart devices and PCs

Hikvision's Sound Cube easily connects to laptops, desktops, and Bluetooth-enabled smartphones or tablets. A simple plug and play setup gets your meetings started in seconds.

Wireless USB  
adapter  
(S1)

Bluetooth  
(S1)

USB cable  
(S1/S1V)

# A big step up for your current setup

Compatible with most mainstream operating systems and software

The Sound Cube ensures high-quality audio and conferencing experience, integrating with most leading video conferencing platforms.
